

Financial Tear Sheet

Corporate Profile

BlackLine is a high-growth, Software-as-a-Service business that is transforming and modernizing the way finance and accounting departments operate. Our cloud-based software platform supports critical finance and accounting processes, including the financial close, account reconciliation, intercompany accounting and controls assurance. Because our software automates these processes and allows them to function continuously, we are empowering companies of all industries and sizes around the globe to improve the integrity of their financial reporting, achieve efficiencies and enhance real-time visibility into their operations.

BlackLine's approach modernizes what historically has been done through spreadsheets and manual controls. Our solutions deliver dynamic workflows embedded within a real-time, highly automated framework, a process we refer to as "continuous accounting."

BlackLine pioneered this market and maintains a leadership position in what Frost & Sullivan has deemed a \$17 billion total addressable market -- consisting of more than 165,000 potential customers and over 13 million finance and accounting professionals worldwide.
